

COOL HOLLOW COACHING

Miro Board Prep Pack

Business Without You: the community model, mapped

For the call with Mike (Senteo), July 14, 2026

Prepared July 6, 2026

Internal working document. This packages the four whiteboard exercises from Mike's Miro board, filled in for our business, so you can read them offline before the call and place them on the board quickly.

The one idea behind all of it

The 12-week program is the **front door**, not the business. The real business is a **recurring community**: ongoing coaching, tools, and partner services an owner pays for over years. Every exercise below maps how one owner becomes years of value instead of a single \$5,000 sale. Mike's car-ownership example is the template; this is our version of it.

Exercise 1: Package Breakdown (the nested rings)

Four rings, center outward. The center is the one thing they buy; each ring further out is a looser, longer-term layer of the relationship.

RING	WHAT GOES IN IT (our business)
Core Product (center)	Business Without You membership: the transformation itself. 15 hours back, up to \$50,000 in profit found, a business that runs without the owner. Entered through the 12-week program, lived in the ongoing community.
Accessories (direct add-ons)	Profit Discovery Session (Cam) Hiring Sprint (Hannah) Hidden-Profit Analyzer 5-metric Monday dashboard 13-week cash-flow forecast client action-plan templates
Education & Planning (learn / decide / run it)	Core video content library (Zoom-first) weekly live Q&A; with Mark monthly CFO Office Hours (Cam) guest masterclasses curriculum workbooks + checklists knowledge library
Memorabilia / Ecosystem (loyalty, long-tail)	Cool Hollow Mastermind (application-only) quarterly business reviews member discounts on partner services peer owner network live events / retreats referral rewards + alumni status

Exercise 2: The Journey (before / journey / after)

The owner's transformation journey. Stages across the top, two rows filled at each stage: the touchpoints, and the experience to design in or out.

BEFORE

The owner is the single point of failure. 60+ hour weeks, can't take a vacation, everything routes through them, profit leaking they can't see, a business unsellable because it is them.

STAGES ACROSS THE TOP

Wake-Up → Diagnostic → Onboarding (12 weeks) → Convert to Member → Ongoing Community → Ascend

STAGE	DIALOGUE & COMMUNICATION	EXPERIENCE
Wake-Up	IG pain-point content, 'you're the bottleneck' hooks, free analyzer.	+ Sees themselves clearly for the first time.
Diagnostic	Profit Discovery booked, analyzer result, 'here's what we found' call.	+ Fast early win: profit found in week 1-2.
Onboarding	Weekly 12-week modules, milestone check-ins, community welcome.	+ Time visibly returning. - Homework overload risk.
Convert	'Your program's ending, here's what continues', founding-member invite.	- Risk of feeling sold-to. Design this gently.
Ongoing	Weekly Q&A; reminders, CFO Office Hours, monthly wins recap, community threads.	+ A room of owners who get it. - Empty-room risk.
Ascend	Quarterly review invites, mastermind application, premium-service offers.	+ Bigger moves with the full team.

AFTER

Business runs without them. 15 hours a week back, \$50K+ found, five metrics checked in 15 minutes every Monday, a team that owns the seats, a business worth selling. Now an advocate and a referrer, staying in the community for the peer network and ongoing edge.

Exercise 3: Cyclic Identification & Mapping (the arcs)

Four arcs, inner to outer. This is the recurring-revenue engine: what naturally repeats for an owner, and how we earn from it again and again.

Arc 1 - Identify Cyclical Purchase Patterns

- Trigger cycles: new fiscal year, tax season, hiring season, growth plateau, cash crunch, key employee leaves, planning an exit.
- Preset recurrence: monthly financial review, quarterly planning, annual strategy reset.
- Ongoing needs: cash-flow management, KPI tracking, hiring, constraint-breaking, profit optimization.

Arc 2 - Opportunities to Shape Those Patterns

- Annual membership renewal built in.
- Quarterly business reviews scheduled by default.
- 'Next milestone' prompts once one is complete.
- Seasonal sprints timed to their calendar (Hiring Sprint before busy season).
- Early-bird / founding-member pricing; tier upgrade offered at growth moments.

Arc 3 - Additional Ways to Monetize the Relationship

- Fractional CFO retainer (Cam); tax-strategy service.
- Business valuation (quick estimate to full).
- Done-for-you dashboard / systems builds.
- Cool Hollow Mastermind tier; live events / retreats; partner referrals (revenue share).

Arc 4 - Elements of the Themed Ecosystem

- Member discounts across all partner services.
- Knowledge library (playbooks, templates, benchmarks).
- Peer community + owner directory (social layer); gamified milestone tracking.
- Referral program + alumni network; future tool marketplace; live-data dashboard integration.

Exercise 4: CJM Blueprint Components (the master grid)

The synthesis grid. Nine component rows across a From → Journey → To timeline. Every item is tagged by status using Mike's four-color sticky key.

KEY	EXISTS	PLANNED	PARTNER-EXISTS	PARTNER-PLANNED
-----	--------	---------	----------------	-----------------

Timeline: **FROM** = entry / onboarding. **JOURNEY** = ongoing community life. **TO** = mature member / outcome. Tags below: [E]xists, [P]lanned, [PE] partner-exists, [PP] partner-planned.

# COMPONENT	FROM	JOURNEY	TO
1 Planning & Tracking Tools	Hidden-Profit Analyzer [E]; 5-metric dashboard [E]; 13-week forecast [E]	Live monthly dashboard [P]; quarterly KPI review [P]	Dashboard on live numbers [P]; peer benchmarks [P]
2 Education & Expert Support	12-week modules [E]; workbooks + checklists [E]	Weekly Q&A; w/ Mark [P]; video library [P]; CFO Office Hours [PP]; masterclasses [PP]	Mastermind strategy [P]; full knowledge library [P]
3 Own Products & Accessories	Business Without You 12-week [E]; action-plan templates [E]	Community membership tiers [P]	Cool Hollow Mastermind [P]
4 Partner Products & Accessories	Profit Discovery, Cam [PE]; Hiring Sprint, Hannah [PE]	Fractional CFO retainer, Cam [PE]; tax strategy [PP]	Business valuation: quick to full [PP]
5 Marketplace Product Options	-	Vetted third-party tool directory [P] (phase 3)	Full marketplace w/ member discounts [P]
6 Social Components	Community welcome + intro thread [P]	Peer community + cohort channels [P]; live events [P]	Alumni network + mastermind circle [P]; referral community [P]
7 Dialogue & Communications	IG content [P]; analyzer follow-up [P]; onboarding emails, GHL [P]	Weekly Q&A; reminders [P]; monthly wins recap [P]; community notifications [P]	Quarterly review invites [P]; renewal + upgrade offers [P]
8 Positive Experience (design IN)	Fast win: profit found wk 1-2; time returning	Weekly access to Mark; a room of owners; visible momentum	Runs without them; 15 hrs back; becomes an advocate
9 Negative Experience (design OUT)	Homework overload; unclear free vs paid	Empty room at launch; momentum drop after onboarding	'Graduated out' w/ nowhere to go; price-vs-value doubt

What the grid shows at a glance

- **Green (exists) clusters at FROM.** Almost everything we have today is onboarding: the analyzer, the 12-week program, the templates. It's real and buildable now.
- **The JOURNEY column is mostly planned.** The recurring middle, the part that makes this a business not a course, is the part we haven't built. That's the July-to-launch work.
- **Partners are real people who already deliver.** Cam and Hannah do this work inside Cool Hollow Solutions today. Productizing them is packaging, not invention.
- **Rows 8 and 9 are the retention design.** The empty-room-at-launch risk is the biggest one, which is why a founding cohort should seed the community before a public freemium tier.

The MVP and the move to make on July 14

The MVP, stated plainly (the green list)

To launch, we need exactly this and nothing more:

- A community platform with member access and rooms.
- Freemium plus at least one paid tier, with payments working.
- GoHighLevel CRM + booking, separate from Cool Hollow Solutions.
- The 12-week program built and deliverable (curriculum is mostly there).
- One fast finance win at entry (Profit Discovery Session with Cam).
- A weekly live Q&A; with Mark.
- Enough core video content to fill the first stretch (recorded Zoom-first).

Everything else is real, but it's what we add after the doors open. The discipline is defending that list and resisting the pull to launch the whole map.

The one line to sav

"Same structure as your car example, built for us: the core product is the owner getting their business back. The 12-week program is how they enter, the community is how they stay, and the cyclical map is how one owner becomes years of revenue instead of a single \$5,000 sale."

Questions to bring to the call

- What's the smallest paid tier that's still worth paying for monthly?
- Do we launch to a founding cohort first, before opening freemium wide?
- How much video is 'enough' for launch, and which milestones record first?
- Where's the free-vs-paid wall?
- What's Mike's role: partner? the journey-mapping workshop?
- What's the honest team capacity for weekly Q&A; + monthly office hours at launch?
