

CHS Community Worksheet — The ACE Map

Drafted July 20, 2026, for the community design work with Mike. Layout follows Matt's whiteboard: **Attractors** at the top (the front doors that bring people in), **Community + Retainers** in the middle (the core relationship, the two overlapping circles), and **Expanders** at the bottom (the deep paid work billed on top).

Only offers we have already named (July 5 offer inventory + the July 17 diagnostic) are filled in. Blank rows are left in every band for you to add services.

How to read the table

Two things from the sketch are captured in the last two columns.

Who delivers it (the crossed-out diagonal boxes in your drawing = partner offers):

- **In-house** — Cool Hollow's own team delivers it.
- **Partner** — delivered by an outside partner, we refer or curate. These are the crossed-out boxes.

Involvement (how full the box is drawn = how hands-on our team is):

- **Full** — our team runs it end to end.
- **Shared** — co-delivered, or we white-label a partner under our brand.
- **Light** — a partner runs it, we introduce and hold the relationship only.

Band 1 — ATTRACTORS (the front door)

Low-cost or free. Their job is to draw the right owners in and start the relationship, not to make the margin.

Band 2 — THE CORE (Community + Retainers)

The two overlapping circles. This is where people land and stay, and where the lifetime value lives. Community is what you belong to; the retainer is the guidance you pay for monthly. Some things sit in the overlap and serve both.

Community

Monthly CFO office hours	With Cam	In-house	• Full

Annual refresher pass	Alumni re-run the milestones as their business changes	In-house	• Full

Band 3 — EXPANDERS (the deep paid work)

Priced on top of the retainer. Hands-on projects with an assigned team. Almost every one is the cyclical twin of an attractor: the Profit Discovery becomes CFO office hours, the Hiring Sprint becomes recruiting on retainer.

Partner roster (the referral network as it stands)

From the CHS Master Client List, Referral Partners tab. This is the bench the partner-delivered offers draw from. It is real and already built, which is a strength Mike should know about.

Two accounting partners (Boyer & Ridder, Gray Pilgrim) and two legal partners (Singer Law, Mark Orndorf) give redundancy, so no single expander depends on one relationship.

Open questions for Mike

1. **Where does Business Without You sit** — attractor that feeds the core, or the \$5K flagship expander? This changes the whole map. Named in the diagnostic as the real strategic fork.
2. **Which partners to formalize first.** The network already exists (14 partners, see roster), but the referral is informal. Which of these do we turn into a defined, revenue-sharing expander offer, and in what order?
3. **Tax delivery.** We have two accounting firms but need to confirm which one owns tax strategy and planning for the Tier 2 promise.
4. **Who owns relationship management** as a function, so the core actually holds people past 12 months.
