

FOR MARK, CAM & HANNAH

Cool Hollow Coaching.

Business Without You

TEAM UPDATE • JULY 2026

Progress & path forward.

What's been built since June, what we learned from Mike, and where we're taking this next. Nothing here is final. That's your call.

Matt Fitzpatrick • July 8, 2026

Cool Hollow Solutions has a ceiling. This is how we get past it.

Mark's built something real with Cool Hollow Solutions: a profitable, trusted advisory firm. But 1:1 advisory only scales as far as one person's calendar. Cool Hollow Coaching is the online arm built to grow past that ceiling.

ACTIVE CLIENTS

~35

Cool Hollow Solutions today. A strong, proven book of business, running at capacity.

MONTHLY REVENUE

~\$60K

Solid and steady. But it can't grow further without more of Mark's hours, and there aren't more hours.

THE FIX

1 : many

Package the same expertise, the same team, into an online model that scales without needing more of Mark's time per client.

Business Without You: get the owner out of the way of their own business.

The audience: owner-operators of \$1M–\$10M companies who are the bottleneck everything runs through. The promise is simple, provable, and led by the CFO expertise already inside Cool Hollow.

THE HEADLINE PROMISE

15 hrs

Back in the owner's week, plus up to \$50,000 in profit found already sitting inside the business.

LONG-TERM GOAL

\$3M / yr

From 500 clients per year. A real second business line alongside Cool Hollow Solutions.

THE PHILOSOPHY

10x > 2x

"10x is easier than 2x." We push owners toward structural change, not incremental tweaks.

The 12-week curriculum is built, tested, and structured to stick.

Seven milestones, rebuilt with Mike (our Senteo consultant) around a Learn, See, Do, Extend flow so owners get a practice rep before touching their own numbers. Every video capped at 8-15 minutes.

M1-M3

Reclaim, Define, Install

Get the owner's time and identity back, define where the business is going, install a five-metric Monday dashboard.

M4-M5

Break the Constraint, Find the Money

Find and remove the single thing holding growth back, then surface \$50,000+ in profit already inside the business.

M6

Cash-Flow Confidence

A 13-week rolling cash forecast, so the owner can sleep at night knowing what's coming.

M7

Build the Team

So the business runs without the owner in every seat. Hannah's expertise plugs straight in here.

Every milestone has a working tool behind it. Real software, not slideware.

All seven milestone models are built and backtested against real client P&Ls, plus a free public tool already live. The next three slides show exactly how three of them work.

15-Hour Reclaim Protocol

M1 — scores a time log, ranks delegate / automate / eliminate candidates

12-Month Impact Map

M2 — applies the Strategy Razor, outputs 3-5 kept priorities

Monday Morning Dashboard

M3 — picks 5 metrics, sets red/yellow/green thresholds

Bottleneck Breakthrough Plan

M4 — ranks constraints by impact, builds an automation hit list

Profit Discovery Audit

M5 — five-check audit: pricing, cost, customer, mix, leakage

Cash Confidence

M6 — 13-week rolling forecast + receivables-timing check

Build the Team

M7 — delegation-gap ranking, outcome-based hiring templates

Hidden-Profit Analyzer

Free public lead magnet — upload a P&L, get real signal back

The Hidden-Profit Analyzer: upload a P&L, see where the money's leaking.

Live at profit-finder-coolhollow.streamlit.app. This is the free front-door tool a prospect can try before they ever talk to us. Example below: a real anonymized run.

EXAMPLE OUTPUT

“Elite Restoration” — sample P&L

Revenue

\$1,435,139

Gross margin

53%

Operating margin

-5%

Costs as % of revenue

105%

Operating at 105% of revenue in costs is the signal. That's the conversation opener, not a diagnosis.

The Monday Morning Dashboard: five numbers, fifteen minutes, every week.

The tool walks an owner to the five metrics that actually matter for their business, sets red/yellow/green thresholds, and flags which ones are leading indicators. Example below: a trades business.

Two metrics flagged yellow here: backlog and lead flow. That's exactly the kind of early warning this dashboard exists to catch before it becomes a red.

Cash Confidence: a 13-week forecast, so the owner can actually sleep.

Projects cash position 13 weeks out and layers in a receivables-timing check, naming exactly how much cash is overdue against the client's own payment terms.

RECEIVABLES CHECK

Overdue against terms

\$18,400

Net-30 terms, 22 days overdue on average across 4 accounts.

All numbers on this slide are a worked sample, not a real client's book.

The front door is open. People can already find us.

Social first, not the website. Instagram is live, the link-in-bio hub is live and self-hosted, and the funnel site is drafted around a proven pattern: free diagnostic, email gate, then a fit application before any sales conversation.

@businesswithoutyou

Instagram page live, first content posted, built around real owner pain points.

Link-in-bio hub

Self-hosted and branded, no third-party fee or logo. Live on Cloudflare Pages.

Diagnostic-first funnel

Free tool, then email, then a fit-checked application. Drafted, ready to iterate.

First content live

Real posts published, borrowing credibility from Cool Hollow Solutions to warm the cold start.

Our organic funnel, pressure-tested against Hormozi and Cardone.

We studied the best in the business-coaching space and kept only what fits a practical, finance-led brand. Left: the mechanism. Right: how we show up so it actually converts.

Instagram

2 posts/day, value only, one link in bio

Free analyzer

Upload a P&L. Email captured before the result

Results + VSL

“\$X is leaking.” Mark on camera at peak intent

Fit application

Not a sales form. Qualify, don't sell

Booked call

Only warm, self-qualified owners reach here

SWIPE: “BLUE COLLAR KING”

Lead with a number, not a dream

“\$2M shop, \$100K take-home. There's a reason.”
Real numbers disarm a skeptical owner faster than any promise.

HORMOZI TEARDOWN

Finance-led is our white space

No trade coach offers a try-before-you-buy P&L diagnostic. That's our wedge. We don't compete on “runs without you” alone.

CARDONE TEARDOWN

Shoot plainer than the gurus

Real shop and job-site backdrop, operator not guru.
We skip the money-flex. It kills trust with practical owners.

CONTENT CADENCE

Saveable beats shareable

1 Reel + 1 post a day. Carousels like “5 Monday numbers” get saved, and saves are what actually grow this audience.

Every claim stays honest: no invented numbers, and the \$50K figure gets verified against a real client result before it goes in any ad or hook.

The biggest change in our thinking: the program isn't the product. The community is.

A one-time \$5,000 sale caps revenue at how many new people we enroll each month. A recurring community turns one sale into years of value, and that's what actually gets us to \$3M and 500 clients.

● **Entry: the 12-week program**

The front door. Delivers a fast, real win and converts a buyer into a long-term member.

● **Ongoing: the recurring community**

Weekly Q&A with Mark, CFO office hours with Cam, quarterly reviews. This is the real business.

● **Partner-delivered: premium**

Masterclasses, fractional CFO work, valuation assessments. Higher-margin, on the edges.

Every offer we could run, sorted: who delivers it, and how often.

Mapped with Mike. The insight underneath: almost every one-time event has a recurring twin. The events are the entry doors; the recurring side is where people land and stay.

IN-HOUSE

our team

EVENT-BASED • ENTRY DOORS

- Business Without You (12 wk)
- Profit Discovery session — Cam
- Hiring Sprint — Hannah
- 1:1 strategy day — Mark

CYCLICAL • RECURRING (WHERE VALUE LIVES)

- The alumni community
- Weekly Q&A calls — Mark
- Monthly CFO office hours — Cam
- Ongoing access to the 7 tools

PARTNER

network to build

- Guest-speaker masterclasses
- Tax strategy session
- Business valuation
- Exit / succession workshop

- Fractional CFO / bookkeeping
- Tax planning on retainer
- Recruiting on retainer
- Wealth management

The twin pattern: Profit Discovery → monthly CFO office hours. Hiring Sprint → recruiting on retainer. The dashboard build → the monthly accountability rhythm.

Mapping the whole customer journey, not just the sales page.

One of four exercises Mike had us run before the July 14 call. Shown here simplified; the real board has far more detail underneath.

Full board detail: the Miro Board Prep Pack, built and ready for the July 14 call with Mike.

Here's what's still wide open. This is exactly where we need your call.

Everything before this slide is real progress, but none of it locks the business model. These four questions are still being worked through with Mike, and nothing here moves forward without you.

Pricing

STILL OPEN

Freemium plus paid tiers is the shape, but the actual numbers aren't set. Tier 2 is a placeholder, not a price.

The founding cohort

STILL OPEN

Who goes first, and how we avoid launching to an empty room, is a real open risk we're bringing to Mike directly.

The community platform

STILL OPEN

Weekly Q&A, office hours, the content library, the tiers themselves: mapped in concept, not yet built.

Curriculum structure

STILL OPEN

Solid as a draft, but still subject to change as the community-first model gets finalized.

Six more weeks with Mike to turn this into a real business model.

Roughly now through late August. This is the work that finalizes pricing, scope, and the community rebuild before anything goes in front of your sign-off.

1

JULY 14

MVP call with Mike

Bring the founding-cohort question and defend the MVP scope, live on the Miro board.

2

LATE JULY

Lock pricing shape

Freemium tiers, numbers, and the capacity-valve logic for Mark's time, finalized as a proposal.

3

EARLY AUGUST

Map the community build

Platform choice, content cadence, and what “ongoing” actually looks like week to week.

4

LATE AUGUST

Founding cohort ready

Full plan back to Mark, Cam, and Hannah for sign-off before first clients go through.

This only works with your expertise built in, not bolted on.

The curriculum already routes specific milestones to specific people. That's not a placeholder, it's the actual plan, and it needs your voice to be right.

MARK

The face and the teaching

Fronting the video content, same as Cool Hollow Solutions. Zoom-first for now, so you can iterate before any polished filming.

CAM

The CFO milestones

Install the Dashboard and Discover the Hidden Product both lead with your judgment. Your input keeps the \$50K promise honest.

HANNAH

Build the Team

The seventh milestone needs your hiring and people expertise to be genuinely useful, not generic advice.

MATT

Running it day to day

Community, lead flow, sales, marketing, and this whole build. Reporting back to all three of you.

Where this is headed, if the next six weeks land the way we hope.

These are targets, not promises. Every date below still depends on what gets decided over the next six weeks.

THE ASK

I need your eyes, your input, and your yes on the direction.

Not sign-off on every detail today. Just your read on whether this is the right shape, and where your expertise should sharpen it before we lock anything in.

July 14 call with Mike

v1 • July 8, 2026

For Mark, Cam & Hannah

COOL HOLLOW COACHING

This is the beginning of something we build together.

Everything you've seen today is a draft in motion, built to earn your trust that this can work. The final call on pricing, scope, and how it launches stays with the three of you.

BUSINESS WITHOUT YOU • V1
