

FOR THE TEAM

Business Without You.

COOL HOLLOW COACHING

LAUNCH & SCALE

How play

What we are building
takes to launch
Tier 1, with Tier 2

Matt Fitzpatrick · 24

 WHY WE ARE DOING THIS

Cool Hollow Solutions is doing well,

One on one advisory only scales so far. Every new client takes another slice out of slices. Coaching takes the same frameworks and the same team and without costing an hour each. That is the whole idea.

WHERE SOLUTIONS SITS

~\$95k

A month, across about 45 clients. Good work, but capped at how many clients one advisor can hold.

HOW COACHING IS DIFFERENT

Recorded

Filmed once, it serves many owners. One filming instead of one meeting per owner.

WHERE WE ARE TODAY

Most of the work is already done.

The curriculum and the tools are built. What is left is filming the lessons and it.

CURRICULUM

7

Milestones mapped end to end, with a consistent flow and 28 lessons outlined.

TOOLS BUILT

7 / 7

One working tool per milestone, each tested against two sample businesses before client sees it.

Tier 1: Business Without You. \$5,000 milestones.

The promise is simple: **15 hours back, plus up to \$50,000 in profit found.** Eco at their own numbers first, then teaches to what it finds.

1

Reclaim time and identity

Get the owner out of the day to day grind.

HOW OWNERS GO THROUGH IT

Recorded once. Owners join when t

After a short first group while we learn how to run it, owners join whenever t start date. That works because the teaching is recorded and the live time i

HOW IT WORKS

- ✓ **Recorded lessons**, watched at the owner's own pace from their day one.
- ✓ **Monthly live calls** with Cam and Hannah, open to whoever is at that point.
- ✓ **Mark runs the live Q&A** and opens and closes every milestone.
- ✓ **A tool for each milestone**, so owners work on their own numbers, not theory.

WHAT THIS NEEDS FROM THE TEAM

The main thing it needs: filming tim

At 30 to 75 minutes a lesson, here is the honest filming load. We do not need Mark's first two milestones filmed, then the rest can be filmed while the first

PRESENTER	LESSONS	FINISHED HOURS
Mark Milestones 1, 2, 6, and the finale	13	~12 hrs
Cam, CFO Dashboard, profit, cash	11	~10 hrs
Hannah Build the team	4	~3.5 hrs
Total, fully filmed	28	~25 hrs

Filming days assume outlines are ready before camera day and about 3.5 hours of filming per day. Only Mark's first two mile.

 THE PLAN

The plan, in three steps.

1

WEEKS 1 TO 5

Film the core

- Mark films milestones 1 and 2, the 8 lessons needed to open

2

MONTHS 1 TO 3

First group

- Start with 2 to 3 people close to us, the ones whose advice we trust and who can help

- Stand up GoHighLevel for booking and CRM, kept separate from Solutions, and where the program lives
- No clients yet, this is the setup

- Cam and Hannah film their lessons runs
- The goal here is honest feedback and getting it right, not revenue

HOW WE BRING OWNERS IN

How owners find us, without paying

The front door is organic. We show up where owners already are, give them a short call and turn interest into a client. It costs time, not ad money. This is the numbers.

1

ATTRACT

Show up every day

- A new Instagram page, two posts a day
- Built around the pain owners feel: no time, can't step away, it all runs through them
- Hooks drawn from what works across coaching, made ours

2

CAPTURE

Give them something real

- The free Profit Finder, try it before pay
- One link page with every next step in place
- Proof of the core promise, up front

This is the serious organic path behind the year one numbers: time, not ad spend. As content scales, an AI version of Mark's v

THE NUMBERS · TIER 1

Tier 1 is the main focus.

Built on people we know and organic content, no ad spend. Year one is about where the funnel is proven and the pace becomes exponential.

YEAR ONE

\$150k to \$215k

A realistic first year, while we film the rest, run the first group, and start posting.

BUILDS
TOWARD

Estimates, not promises. We are pre launch with no clients yet. As owners build up, hiring help with delivery becomes the next

WHAT THE GOAL TAKES

What it takes, month to month.

At \$5,000 a client, here is the goal broken into sales and a monthly number so the monthly pace shown is the rhythm we build to, not month one.

YEAR ONE

Revenue goal **\$150k to \$215k**

Clients to sell **30 to 43**

New clients a month **3 to 4**

Revenue a month **\$12k to \$18k**

YEAR TWO

Revenue

Clients

New clients

Revenue

At \$5,000 a client. Year two starts where year one ends and ramps through the year to a steady 15 new Tier 1 clients a month, separately.

HOW FAST WE GROW · YEAR ONE

How fast we grow is a choice.

Same product, three levels of effort behind it. This is year one, the slow year. The next slide shows where each one goes in year two.

COAST ON CONTENT

\$40k to \$80k

GET SERIOUS ABOUT SOCIAL

\$150k to \$215k

Posting now and then, no real consistency.
Most of it still comes from people we already know.

Posting every day, real hooks, real effort

What the plan assumes. About 3 to 4 Tier 1 clients a month, building. Time, not money.

Rough estimates, not promises. The plan today is the middle path: serious organic, no ad spend, since there is no budget yet.

HOW FAST WE GROW · YEAR TWO

Year two is where it compounds.

Same three choices, a year later, with results, referrals, and the system all solidified. It is not a straight line, it is exponential. This is the year the big numbers show up.

COAST ON CONTENT

\$150k to \$300k

Even coasting, year two lives off year one's clients, referrals, and content already out there.

GET SERIOUS ABOUT SOCIAL

~\$1.9M

15 new Tier 1 clients a month (~\$900k) and 15 new Tier 2 members a month (~\$1.05M) organic, no ad spend.

The target. Tier 1 and Tier 2 compound together.

The \$3M goal is not a made up figure: 500 Tier 1 clients at \$5,000 is \$2.5M, plus about 25 Tier 2 members at \$25,000–\$35,000 each. Graduates moving up to Tier 2, members referring members, content compounding, is how we get there.

 IF WE ADD PAID ADS

What paid ads would look like.

Paid ads buy speed. Here is a rough year running them, and the budget it would cost more to win, until the funnel is proven.

THE SPEND

Ad budget	~\$12k a month
A year	~\$144k
Cost to win one client	~\$1,200

THE RESULTS

Clients
Tier 1 referrals
Kept after 90 days

Rough estimates, not promises. Paid results vary a lot, and a new funnel costs more per client until it is dialed in. It needs cash.

\$850 a month that builds the funnel lights on.

I have built a system around myself to run this effectively, without a big team. The ~\$850 a month is not overhead, it is what lets us build and grow the org. It compounds the way it does. No office, no ad spend in year one.

MONTHLY TO RUN IT

CRM, funnel & booking (GoHighLevel)	\$300
Content & creative tools	~\$280
AI, research & apps	~\$170
Email, meetings & hosting	~\$100
Total a month	~\$850

Approximate, on solid mid tier plans, not the cheapest and not enterprise. The system around me does the heavy lifting, so the costs scale only as clients do.

WHAT

To run it

What the

Ad bud

Run by

Tier 2 comes later.

It starts once Tier 1 has owners with real results behind it. Fewer clients, high day support. It grows exponentially: Tier 1 graduates move up, members refer, community compounds on itself.

WHAT IT WOULD LOOK LIKE

- For owners doing \$10M and above
- Tax strategy, investment, and scaling
- A community with 1 to 2 live sessions a week
- The full team in the room: CFO, COO, people, and Mark on strategy

START

\$2

Somewh
of team

THE NUMBERS · TIER 2

Tier 2, on its own.

A few members move the total a long way, because each one is worth more support behind it. This is the exponential layer: it builds on Tier 1 growth

\$220k to \$330k

10 to 15 members

\$66k to \$110k

3 to 5 first members

First members

once Tier 1 has results

Building

as Tier 1 owners move up

Estimates at \$25,000–\$35,000 per member. Tier 2 depends on Tier 1 producing real results first, so these numbers come after,

The two tiers, kept separate.

Tier 1 first, to get owners real results. Tier 2 after, because it is worth more per member. Both tiers come together, with each run on its own. The growth from year one to year two is exponential: Tier 1 graduates feed Tier 2, members refer members, and compound.

STAGE	TIER 1	TIER 2
Year one	\$150k to \$215k	Not started
By 18 months	\$300k to \$450k	\$440k to \$600k
Year two, full ramp	~\$900k	~\$1.05M

Year one is the smallest year on purpose. By 18 months matches the Tier 2 numbers slide, with 20 to 30 members. The year two target is every month, the same target as the growth slide. Nothing here is a promise.

What this is worth, for the time it takes

The lessons are recorded, so the weekly commitment is small. At a steady state of 100 members, here is the year, and what it works out to a week.

THE YEAR

Tier 1: 80 clients at \$5,000	\$400k
Tier 2: 10 members at ~\$30,000	\$300k
Total a year	\$620k

~\$

a week

~3

of your

At \$5,000 a Tier 1 client and \$25,000–\$35,000 a Tier 2 member. The recorded lessons do the teaching, so the weekly time is minimal.

WHAT WE NEED TO DECIDE

What we need to decide.

1

Filming time

Mark, Cam, and Hannah confirm the days they can give, and when.

2

Lesson length

Settle on a target per lesson so we can schedule the filming.

3

The first group

Agree who the first 2 to 3 people are, the ones whose feedback we trust.

4

Tier 2 in principle

Agree it is the longer term direction, so we build Tier 1 to lead into it.
