

COOL HOLLOW COACHING

# Business Without You

Signature Framework and Funnel Blueprint

Internal Briefing — July 1, 2026

For Cam and Mark

*This document is confidential and for internal use only. No figures or claims here are public-facing until verified and approved by Matt.*

## Part 1: The Signature Framework

### Why we need a named framework

Business Without You is a strong curriculum: seven milestones, twelve weeks, seven working tools. What it is not yet is a **named, ownable method** a prospect can picture in one glance and a graduate can describe to a colleague in one sentence. Every premium program that commands a premium price has a piece of visual IP that makes the method feel engineered, not improvised. That is what justifies the \$5,000 price without apology: you are not buying coaching hours, you are buying a proven operating system.

### The framework name (decided July 1. 2026)

***The Business Without You Method***

The program name is the method name. Zero new branding to build, and "method" signals engineered, not improvised. All copy, the VSL, and the landing page will use this name.

### The three-phase structure

| PHASE                              | WEEKS | MILESTONES                                                                                                 | PROMISE                                            |
|------------------------------------|-------|------------------------------------------------------------------------------------------------------------|----------------------------------------------------|
| Phase 1<br>Get Your Time Back      | 1–3   | 1. Reclaim the Owner's Time and Identity<br>2. Define the Destination with Precision                       | 15 hours back on your calendar before we ask for   |
| Phase 2<br>Find the Money          | 4–7   | 3. Install the Dashboard That Tells the Truth<br>4. Discover the Hidden Profit<br>5. Build Cash Confidence | A specific dollar figure found in your own books b |
| Phase 3<br>Make It Run Without You | 8–12  | 6. Break the Binding Constraint<br>7. Build the Team That Builds the Business                              | The two-week vacation test. The business passe     |

## The one-alance version

***Get your time back. Find the money. Make it run without you.***  
*Seven milestones. Twelve weeks. Seven working tools you keep.*

## The premium logic: Seven milestones, seven tools

The tools are the physical proof that this is a system, not a seminar. Every milestone ends with the owner's own data running through a purpose-built model that outputs a named, specific recommendation. Nobody leaves with notes; everyone leaves with a working dashboard, a 13-week cash forecast, a reclaim protocol, and a hiring system — built on their numbers, theirs to keep.

***"You don't graduate with a binder. You graduate with a working operating system: your dashboard, your cash forecast, your delegation map, your hiring templates. Built on your numbers, yours to keep."***

## The seven tools (all live)

| MILESTONE                  | TOOL                         | WHAT IT OUTPUTS                                                         |
|----------------------------|------------------------------|-------------------------------------------------------------------------|
| 1 — Reclaim Time           | 15-Hour Reclaim Protocol     | Ranked delegate / automate / eliminate list with deadlines              |
| 2 — Define Destination     | 12-Month Impact Map          | 3-5 filtered priorities + a focus score                                 |
| 3 — Install Dashboard      | Five-Metric Dashboard        | Right metrics, red/yellow/green thresholds set against owner's targets  |
| 4 — Discover Hidden Profit | Profit Discovery Audit       | Specific dollar figure found: pricing gaps, cost leaks, revenue leakage |
| 5 — Build Cash Confidence  | 13-Week Cash Forecast        | Rolling forecast + Decision Filter + receivables-timing check           |
| 6 — Break Constraint       | Bottleneck Breakthrough Plan | Single binding constraint named + effort-adjusted automation hit list   |
| 7 — Build the Team         | Hiring & Delegation System   | Outcome-based templates, delegation gap score, leadership scorecard     |

## Part 2: The Relationship-Centric Business Model

The goal is a client who pays \$5,000 once but is worth far more than \$5,000 — not through upsell pressure, but because the relationship genuinely keeps paying them. Five layers, in the order a client experiences them.

### Layer 1 — The habit that outlives the program

The Monday Morning Dashboard is the retention engine hiding in plain sight. By week 4 every client has a five-metric dashboard and a 15-minute Monday review rhythm. That rhythm is a weekly touchpoint with our system, forever. The dashboard and the 13-week cash forecast (which needs refreshing every week to stay alive) are the reason clients stay connected after week 12.

Layer 2 — The graduate re-audit (the comeback moment)

90 days after the Liberation Finale, every graduate gets a personal invitation to re-run their numbers: fresh Profit Discovery Audit, fresh dashboard thresholds, fresh reclaim scan. This shows them their progress in their own numbers (the strongest testimonial generator we will ever have), surfaces new leakage, and puts a real date in the calendar so graduation never means goodbye. Costs us almost nothing because the tools already exist.

Layer 3 — The alumni circle

Graduates keep access to the tool suite, a monthly open Q&A; call with Mark, and each other. Not a paid tier, not a heavy build. Owners of \$1M to \$10M businesses are isolated; the peer room is worth more to them than most content. This is also where Tier 2 invitations come from, so ascension happens inside a warm room.

Layer 4 — The ascension path

Tier 2 at \$22K/yr stays invitation-only for graduates who got a result. "The audit found \$X. Tier 2 is where the full team helps you take the bigger swings: tax strategy, investment, 10x moves." The \$50K found in Tier 1 funds Tier 2. The 4.4x price jump is bridged by the re-audit (Layer 2) and the alumni circle (Layer 3), so the invitation happens after renewed proof, not straight off the finale.

Layer 5 — The referral loop

The natural moment to ask is the re-audit, when a graduate is looking at their own before-and-after numbers. The ask: "Who do you know who's where you were six months ago?" Referrals from owners whose numbers moved are the highest-trust lead source available. Referral mechanics (thank-you format, incentive) are parked until launch.

Part 3: The Client Acquisition Funnel

The mechanism is Hormozi's diagnostic-first structure, adapted for Business Without You. The hidden-profit analyzer is the front door. Free diagnostic first, email gate before the result, immediate next-step pitch on the results page, fit application, booked call.

The funnel map

| STAGE                 | ASSET                                                                                 | PSYCHOLOGY                                                                            |
|-----------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| 1. Awareness          | Daily Instagram content. Mark fronts it. Value only, no sales.                        | Give One Little Thing: The strategy, the analysis, the results, the authority builds. |
| 2. Lead capture       | The hidden-profit analyzer. Upload a P&L, get a sized result.                         | Give One Little Thing: The strategy, the analysis, the results, the authority builds. |
| 3. Results page + VSL | On the results page, immediately: 2–4 minute video. Mark fronts it, plain and simple. | Give One Little Thing: The strategy, the analysis, the results, the authority builds. |

|                    |                                                                                                        |                                                                     |
|--------------------|--------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------|
| 4. Fit application | Short application: revenue, hours in the business, biggest pain, the pain, the single point of failure | Position the prospect as the single point of failure                |
| 5. Booked call     | GoHighLevel booking via thank-you.html. Call is NOT required to get the copy                           | Dynamic. We are qualifying them, not pitching                       |
| 6. Tier 1 enrol    | \$5,000, 12 weeks, Business Without You Method.                                                        | Math sells itself: up to \$50K found, program costs \$5K. Lead with |
| 7. Ascension       | Tier 2 at \$22K/yr, invitation-only for graduates with results                                         | 10x is easier than 2x." Proven trust, warm room, not a cold sale.   |

## Part 4: The VSL Beat Sheet

The VSL's one job: convert the results-page visitor into a fit-application submission. It plays at the exact moment the prospect is staring at a dollar figure from their own P&L; — the highest-intent moment we will ever get. 2–4 minutes. Mark on camera, plain operator backdrop (no guru polish). Nothing films until this beat sheet is approved.

Two facts are needed from Mark before final copy is written: (1) the real weekly time commitment outside live sessions, (2) whether there is a guarantee and what it says. Placeholder-safe language is used below until those are confirmed.

| # | BEAT                      | TIME      | DIRECTION                                                                                                   |
|---|---------------------------|-----------|-------------------------------------------------------------------------------------------------------------|
| 1 | The number hook           | 0:00–0:15 | "That number you're looking at is real. And it's probably conservative. I'm Mark, and finding money         |
| 2 | The twist                 | 0:15–0:40 | "Here's what that report can't tell you: WHY the money is leaking. In almost every business we wor          |
| 3 | Credibility, fast         | 0:40–1:00 | Real advisory firm, real clients, a real CFO on staff. Plain facts, no flexing. "We're not consultants i    |
| 4 | The method                | 1:00–1:45 | "Get your time back. Find the money. Make it run without you. Seven milestones, twelve weeks, se            |
| 5 | Time objection, preempted | 1:45–2:15 | "If you're thinking 'I don't have time for a 12-week program,' that's exactly why milestone one exists      |
| 6 | The math                  | 2:15–2:35 | PLACEHOLDER (needs verified client result): "The program costs \$5,000. The audit alone routine             |
| 7 | The fit gate              | 2:35–2:50 | "This isn't for everyone. It's for owners doing \$1M to \$10M who are still the single point of failure. It |
| 8 | The soft close            | 2:50–3:00 | "Your full report is in your inbox either way. If you want help finding the rest, you know where the b      |

## Part 5: Landing Page Layout

The landing page restructured around The Business Without You Method. The analyzer stays the primary CTA throughout — it is the front door, never buried. Nine sections, top to bottom.

| # | SECTION        | CONTENT                                                                                                              | CTA                                         |
|---|----------------|----------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| 1 | Hero           | Headline leads with a number, not a dream: "If you're doing \$1M to \$10M" Find the business side of your business   | Find the business side of your business     |
| 2 | The mirror     | Three short pain statements in the owner's own words. No solution yet. Let them see themselves.                      | Let them see themselves.                    |
| 3 | The diagnostic | The analyzer as the front door: what it does, what they get, ~3 minutes, free. This is the page's center of gravity. | Free. This is the page's center of gravity. |

|   |                      |                                                                                                                 |                                     |
|---|----------------------|-----------------------------------------------------------------------------------------------------------------|-------------------------------------|
| 4 | The method           | The three phases as a visual: Get your time back → Find the money → Make it better without using stress         | None (briefing section)             |
| 5 | Seven tools you keep | Keep tool suite as tangible IP. "You don't graduate with a binder."                                             | None                                |
| 6 | Who's behind it      | Mark, Cam (CFO), Hannah (hiring), Cool Hollow Solutions' track record.                                          | Operators, not suits.               |
| 7 | The math             | Price transparency: \$5,000, 12 weeks. The profit-found-vs-price frame, used only as verified discovery.html    | See only as verified discovery.html |
| 8 | The fit gate         | Who it IS for and who it is NOT for, stated plainly. The not-for list does read "Apply at this discovery point" | Apply at this discovery point       |
| 9 | Footer               | Quiet. Contact, disclosure line, no link soup.                                                                  | Analyzer link repeats               |

## Open Items — Needed Before Final Copy or Filming

### For Mark

- Weekly time commitment outside live sessions (needed for the VSL and landing page copy).
- Guarantee decision: yes, no, or conditioned on what? Do not invent terms.
- Confirm which real client result(s) can be named publicly as verified proof (the \$50K found claim).

### For Cam

- Confirm the receivables-timing module in the Cash Confidence tool matches your methodology.
- Review the Profit Discovery Audit's industry benchmark logic (trades/repair, retail, professional services, high-margin recurring) and flag anything that doesn't hold under scrutiny.
- Confirm you're comfortable being named and quoted in the VSL and landing page.

### For Matt

- Approve the VSL beat sheet above before any filming is scheduled.
- Confirm the landing page section order before the rebuild starts.
- Run milestones 1-3 live with 3-4 beta owners (already the plan) to generate the first real proof numbers.
