

FOR THE TEAM

Business Without You.

COOL HOLLOW COACHING

LAUNCH & SCALING PLAN · V2

How this plays out.

What we are building, how we bring owners in, what it takes to launch, and a realistic look at the numbers for Tier 1, with Tier 2 outlined.

Matt Fitzpatrick · 24 June 2026

Cool Hollow Solutions is doing well, but it is full.

One on one advisory only scales so far. Every new client takes another slice of our time, and we are running out of slices. Coaching takes the same frameworks and the same team and delivers them to more owners, without costing an hour each. That is the whole idea.

WHERE SOLUTIONS SITS

~\$95k

A month, across about 45 clients. Good work, but capped at how many clients one advisor can hold.

HOW COACHING IS DIFFERENT

Recorded

Filmed once, it serves many owners. One filming instead of one meeting per owner.

WHAT WE REUSE

Everything

Our frameworks, our finance and people expertise, and the Cool Hollow name. None of this starts from scratch.

Most of the work is already done.

The curriculum and the tools are built. What is left is filming the lessons and getting the first owners through it.

CURRICULUM

7

Milestones mapped end to end, with a consistent flow and 28 lessons outlined.

TOOLS BUILT

7 / 7

One working tool per milestone, each tested against two sample businesses before any client sees it.

FRONT DOOR

Live

Instagram page, a branded link page, and a free profit finder tool, all standing and ready for content.

Tier 1: Business Without You. **\$5,000**, 12 weeks, 7 milestones.

The promise is simple: **15 hours back, plus up to \$50,000 in profit found.** Each milestone has the owner look at their own numbers first, then teaches to what it finds.

1 Reclaim time and identity

Get the owner out of the day to day grind.

Tool: 15-Hour Reclaim Protocol

3 Install the dashboard

Five metrics, 15 minutes every Monday.

Tool: Monday Morning Dashboard

5 Build cash confidence

A 13 week forecast so the owner can sleep.

Tool: 13-Week Cash Forecast

7 Build the team

So it runs without the owner in every seat.

Tool: Build the Team Scorecard

2 Define the destination

Get clear on where the business is going.

Tool: 12-Month Impact Map

4 Discover the hidden profit

Surface the profit already in the business.

Tool: Profit Discovery Audit

6 Break the binding constraint

Remove the one thing capping growth.

Tool: Bottleneck Breakthrough Plan

Recorded once. Owners join when they are ready.

After a short first group while we learn how to run it, owners join whenever they are ready, not on a fixed start date. That works because the teaching is recorded and the live time is open to everyone.

HOW IT WORKS

- ✓ **Recorded lessons**, watched at the owner's own pace from their day one.
- ✓ **Monthly live calls** with Cam and Hannah, open to whoever is at that point.
- ✓ **Mark runs the live Q&A** and opens and closes every milestone.
- ✓ **A tool for each milestone**, so owners work on their own numbers, not theory.

Who teaches what

Mark

Milestones 1, 2, 6, finale

13 lessons

Cam, CFO

Dashboard, hidden profit, cash confidence

11 lessons

Hannah

Build the team

4 lessons

The main thing it needs: filming time.

At 30 to 75 minutes a lesson, here is the honest filming load. We do not need it all before we start. We need Mark's first two milestones filmed, then the rest can be filmed while the first group is going through it.

PRESENTER	LESSONS	FINISHED HOURS	FILMING DAYS
Mark Milestones 1, 2, 6, and the finale	13	~12 hrs	6 to 7 days
Cam, CFO Dashboard, profit, cash	11	~10 hrs	5 to 6 days
Hannah Build the team	4	~3.5 hrs	~2 days
Total, fully filmed	28	~25 hrs	13 to 15 days

The plan, in three steps.

1**WEEKS 1 TO 5**

Film the core

- Mark films milestones 1 and 2, the 8 lessons needed to open
- Stand up GoHighLevel for booking and CRM, kept separate from Solutions, and where the program lives
- No clients yet, this is the setup

2**MONTHS 1 TO 3**

First group

- Start with 2 to 3 people close to us, the ones whose advice we trust and who will help
- Cam and Hannah film their lessons while it runs
- The goal here is honest feedback and getting it right, not revenue

3**MONTHS 4 TO 12**

Open it up

- Owners can join anytime, no fixed start
- Instagram content and referrals bring in new owners
- Real results start doing the talking

How owners find us, without paying for it.

The front door is organic. We show up where owners already are, give them something real to try, then a short call turns interest into a client. It costs time, not ad money. This is the engine behind the year one numbers.

1**ATTRACT****Show up every day**

- A new Instagram page, two posts a day
- Built around the pain owners feel: no time, can't step away, it all runs through them
- Hooks drawn from what works across coaching, made ours

2**CAPTURE****Give them something real**

- The free Profit Finder, try it before paying a cent
- One link page with every next step in one place
- Proof of the core promise, up front

3**CONVERT****Turn interest into clients**

- A short discovery call
- The right owners step into Tier 1 at \$5,000
- Results and referrals feed the top back

Tier 1 is the main focus.

Built on people we know and organic content, no ad spend. Year one is about getting it right. Year two is where the funnel is proven and the pace becomes exponential.

YEAR ONE

\$150k to \$215k

A realistic first year, while we film the rest, run the first group, and start posting.

BUILDS
TOWARD

YEAR TWO

~\$900k

Ramping to 15 new Tier 1 clients a month, organic, as word of mouth and content compound.

What it takes, month to month.

At \$5,000 a client, here is the goal broken into sales and a monthly number to aim at. Each year ramps up, so the monthly pace shown is the rhythm we build to, not month one.

YEAR ONE

Revenue goal **\$150k to \$215k**

Clients to sell **30 to 43**

New clients a month **3 to 4**

Revenue a month **\$12k to \$18k**

YEAR TWO

Revenue goal **~\$900k**

Clients to sell **~150 to 180**

New clients a month **Ramping to 15**

Revenue a month **\$25k to \$75k**

At \$5,000 a client. Year two starts where year one ends and ramps through the year to a steady 15 new Tier 1 clients a month, the rate behind the year two target on the growth slide. Tier 2 is on top of this, shown separately.

How fast we grow is a choice.

Same product, three levels of effort behind it. This is year one, the slow year on purpose, while we get it right. The next slide shows where each one goes in year two.

COAST ON CONTENT

\$40k to \$80k

Posting now and then, no real consistency.
Most of it still comes from people we already know.

GET SERIOUS ABOUT SOCIAL

\$150k to \$215k

Posting every day, real hooks, real effort.
What the plan assumes. About 3 to 4 Tier 1 clients a month, building. Time, not money.

ADD PAID MARKETING

\$400k to \$600k

Pay to reach more owners, faster. Quicker growth, but it needs a real ad budget. A later slide breaks it down.

Year two is where it compounds.

Same three choices, a year later, with results, referrals, and the system all stacking. The jump from year one is not a straight line, it is exponential. This is the year the big numbers show up.

COAST ON CONTENT

\$150k to \$300k

Even coasting, year two lives off year one's clients, referrals, and content already out there.

GET SERIOUS ABOUT SOCIAL

~\$1.9M

15 new Tier 1 clients a month (~\$900k) and 4 new Tier 2 members a month (~\$1.05M), organic, no ad spend.

The target. Tier 1 and Tier 2 compounding together.

ADD PAID MARKETING

~\$3M+

Ads on top of a proven funnel. This is where the \$3M goal lands, not someday, year two.

The \$3M goal is not a made up figure: 500 Tier 1 clients at \$5,000 is \$2.5M, plus about 25 Tier 2 members at \$22,000. That is the arithmetic of the long term target, and exponential growth, graduates moving up to Tier 2, members referring members, content compounding, is how we get there.

What paid ads would look like.

Paid ads buy speed. Here is a rough year running them, and the budget it would take. Early on each client costs more to win, until the funnel is proven.

THE SPEND

Ad budget	~\$12k a month
-----------	----------------

A year	~\$144k
--------	---------

Cost to win one client	~\$1,200
------------------------	----------

THE RETURN

Clients a year	~120
----------------	------

Tier 1 revenue	~\$600k
----------------	---------

Kept after ad spend	~\$456k
---------------------	---------

\$850 a month that builds the funnel, not just keeps the lights on.

I have built a system around myself to run this effectively, without a big team. This stack is what powers it. The ~\$850 a month is not overhead, it is what lets us build and grow the organic funnel faster, so year two compounds the way it does. No office, no ad spend in year one.

MONTHLY TO RUN IT

CRM, funnel & booking (GoHighLevel)	\$300
Content & creative tools	~\$280
AI, research & apps	~\$170
Email, meetings & hosting	~\$100
Total a month	~\$850

WHAT THAT MEANS

To run it, a month	under \$1,000
What the \$850 buys	A faster funnel
Ad budget, year one	\$0
Run by	One operator + a system

Approximate, on solid mid tier plans, not the cheapest and not enterprise. The system around me does the heavy lifting, so this small monthly spend turns into faster content, a faster funnel, and exponential year two growth. Costs scale only as clients do.

Tier 2 comes later.

It starts once Tier 1 has owners with real results behind it. Fewer clients, higher value, and a lot less day to day support. It grows exponentially: Tier 1 graduates move up, members refer other big owners, and the community compounds on itself.

WHAT IT WOULD LOOK LIKE

- For owners doing \$10M and above
- Tax strategy, investment, and scaling
- A community with 1 to 2 live sessions a week
- The full team in the room: CFO, COO, people, and Mark on strategy

STARTING PRICE

\$22,000 / year

Somewhere in the \$15k to \$25k range, as a yearly membership for that level of team access. A starting point, not a final call.

Tier 2, on its own.

A few members move the total a long way, because each one is worth more than three Tier 1 clients, with far less support behind it. This is the exponential layer: it builds on Tier 1 graduates and member referrals.

The two tiers, kept separate.

Tier 1 first, to get owners real results. Tier 2 after, because it is worth more per client. Here is the picture if both come together, with each run on its own. The growth from year one to year two is not a straight line, it is exponential: Tier 1 graduates feed Tier 2, members refer members, and content compounds.

STAGE	TIER 1	TIER 2	TOGETHER, PER YEAR
Year one	\$150k to \$215k	Not started	\$150k to \$215k
By 18 months	\$300k to \$450k	\$440k to \$660k	~\$740k to \$1.11M
Year two, full ramp	~\$900k	~\$1.05M	~\$1.9M

Year one is the smallest year on purpose. By 18 months matches the Tier 2 numbers slide, with 20 to 30 members. The year two, full ramp row is the target run rate: 15 new Tier 1 clients and 4 new Tier 2 members every month, the same target as the growth slide. Nothing here is a promise.

What this is worth, for the time it takes.

The lessons are recorded, so the weekly commitment is small. At a steady 80 Tier 1 clients and 10 Tier 2 members, here is the year, and what it works out to a week.

THE YEAR

Tier 1: 80 clients at \$5,000	\$400k
-------------------------------	---------------

Tier 2: 10 members at \$22,000	\$220k
--------------------------------	---------------

Total a year	\$620k
--------------	---------------

~\$11,900

a week

~3 hours

of your time a week

WHAT WE NEED TO DECIDE

What we need to decide.

1

Filming time

Mark, Cam, and Hannah confirm the days they can give, and when.

2

Lesson length

Settle on a target per lesson so we can schedule the filming.

3

The first group

Agree who the first 2 to 3 people are, the ones whose feedback we trust.

4

Tier 2 in principle

Agree it is the longer term direction, so we build Tier 1 to lead into it.

COOL HOLLOW COACHING

Most of the work is done. What is left is filming, and the first few owners.

Year one is about getting it right, not the revenue. Get the first owners a real result and everything after that gets easier.
